

OB van

AVA has recently evolved into one of the biggest production companies in Croatia. With future projects in mind, they ordered an OB van from AVC. Our team of experts has professionally fulfilled every request: from the initial meetings regarding the concept of the van, through concrete details concerning the technical characteristics, choice of equipment and requests for interior design, to the delivery itself and the subsequent support during field work. The van was equipped with 5 digital cameras, 3 digital recorders, 24-channel audio mixer, intercom system etc. The OB van is in use since 2005.
