

Multimedia hall in the Headquarters

The hall was planned for conference meetings, Board of Managers and Supervisory Board meetings, presentations, and all other kinds of multimedia events. The audio system in the hall is based on BSS Soundweb platform and sound console SOUNDCRAFT with JBL loudspeakers and AKG wireless microphone system. Digital system of conference microphones with DIS DCS6000 booth completes the needs of recording the conferences, meetings and presentations with simultaneous interpretation. SONY LCD projectors and a system of controllable PTZ cameras with the combination of videoconferencing system enable the transmission to distant locations. All the systems in the hall are centrally controlled by high quality AMX system 12" panels with pre-programmed scenes and carefully designed graphic interface for easy control of audio/video signal. Only one touch on the control panel allows you to set the hall for the required event.
