

Audio/Video Systems

During 2005, the premises of the Podravka Headquarters in Koprivnica (Croatia) were being equipped with contemporary audio/video systems. The complete redecoration of the Headquarters Building ground floor included equipping rooms for meetings and lectures (seven halls in total). Five smaller halls for meetings and presentations were equipped with presentation systems with SONY plasma monitors. The big lecture hall was equipped with presentation audio/video system with a screen, electronic blackboard and videoconference system with controllable SONY PTZ video cameras. The Round Room was equipped for meetings of the Chairman Board and presentations. In both halls there is a JBL 5+1 sound system. The entrance hall, as well as the corridors, was wired for sound with a ceiling system, and the marketing video materials were incorporated with the entrance hall's architecture. In the beginning of 2006 AVC has continued its successful cooperation with Podravka Company and was equipping the Chairman Board premises in Zagreb with video presentation systems.
