

PA system

The Church of the St. Cross (Crkva Svetog Križa) is a magnificent building that was under construction for almost 10 years and was finally consecrated in 1983. It has 1500m², it is 55m long, 33m wide and 28m high. There are 800 seats and standing room for 1200 people. The sound system project was a great challenge and honour for us. Before installing the equipment, a virtual model was made using special computer programmes in which all loudspeakers' positions and tilts were precisely defined. The system consists of a cluster of JBL loudspeakers suspended over the altar at almost 18 meters of height, with additional loudspeakers on the gallery. The installation was a special procedure that was completed in cooperation with a professional rock climber.
