

Conference Room

As a bank in a city by the sea, a bank in a city at the border, the history of Banka Koper is a history in which a change has always been an every-day imperative. The diversity of the neighbouring countries, its cultures, its people, political and economic systems, and the international influences that come in and out of the city through the port, the gateway of Central and Eastern Europe, have made it possible for the bank to be prompt to every single novelty that was "in the air" around the world.

The world of information technology, where geographical, state and language borders no longer present an obstacle, puts new demands on today's businessmen. The management of Banka Koper d.d. is aware of that. We equipped their conference room with a state of the art multimedia system, which includes a conference system, a system for interpreting, a videoconference system, a presentation system and a zone sound system. All the devices can be simply controlled through the central control system.
