

Multichannel audio system for recording court hearings

Brcko District Court, Bosnia and Herzegovina, with 13 courtrooms and 2 Prosecutor Offices are equipped with the state of the art equipment for multichannel sound recording of the hearings and inquests and recording the court protocol produced by FTR (For the record). AVC delivered and installed the equipment and conducted a three day training of the IT staff and users of the multichannel recorder of the hearings. Installation of the system in 15 courtrooms/offices includes the delivery and installation of the sound system. AVC technically united the entire process of the automatic sound recording of the court hearings and parallel archiving of the audio recordings, making the written records, copies, central monitors and recording control, as well as the entire case management of the recorded/written material.
