

## Sound system

Film sound gets finalized in a film studio, where authors can check and complete their work on a referential sound system. We installed the sound system for the film recording control rooms of Viba film Ljubljana. In accordance with the Dolby standards we used the JBL 3632 T Screen speakers, JBL 4645 C subwoofers, JBL 8340 Surround speakers and Crown MT 600 and MT 1200 amplifiers.
