

## **On-Air Mixing consoles**

RTV Slovenija knows reliable equipment is needed for 24/7 live radio programme and specially if this is the most popular national radio station. This fact led into decision to install two STUDER On-Air 3000 consoles for their 1. program and 2. program. Radio news, broadcasting sport events and live concerts, contact shows are all handled by STUDER's consoles in two studios.

Modular design, new DSP engine using the same algorithms as VISTA, "Touch'n'Action" philosophy, colour GUI screens give operator the confidence for daily operation.
